DETAILED ACTION

Claim Objections

1. Claim 9 is objected to because of the following informalities:

at the end of line 12 of the claim, insert --channel--.

Appropriate correction is required.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1-8 and 18-20 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1, 2, and 10-12 of U.S. Patent No. 6,014,705. Although the conflicting claims are not identical, they are not patentably distinct from each other because one of ordinary skill in the art, at the time the invention was made, would have readily recognized that a predetermined set of antennas connected to a base module helps the base module to optimally and effectively communicate with other RF communicating units. Therefore, it would have been obvious to one of ordinary skill in the art to modify the teachings of the aforementioned patent with a predetermined number of antennas.

Allowable Subject Matter

4. Claims 9-17 are allowed.

5. The following is an examiner's statement of reasons for allowance: limitations citing a method wherein if during the sensing of the communication channel the channel did not remain clear, waiting for a second predetermined time, and branching to a step of sensing the communication channel for a first predetermined time, a method wherein if during sensing of the communication channel the channel did not remain clear, incrementing a retry count, and a method of identifying that the RF communication link is clear throughout a period which is at least as long as the interpoll gap read over the prior art of record, either alone or in combination thereof.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Callaghan et al. (US 6,058,304) teach a data entry system.

Dailey et al. (US 5,487,181) teach a low power architecture for portable and mobile two-way radios.
